

# ***Research for Undergraduates in Theoretical Ecology***

The ***RUTE Scholars*** program is an NSF-funded research program for undergraduates in mathematics, natural resources, or biology.

Two teams of four students each will examine either plant & insect dynamics in Nebraska **grasslands** or canopy & light dynamics in Borneo **rainforests**.

This one-year program involves three courses:

Spring	plan research
Summer	conduct 10-week field research
Fall	model questions mathematically

### **Scholarships include:**

- \$3250 stipend for the summer
- Travel and housing for summer research
- Tuition reimbursement for the three courses

To apply, submit a short application and schedule an informational meeting at

[www.unl.edu/rute](http://www.unl.edu/rute)

**Due Date: October 24, 2007**
