

# FALL 2017 BIOS COURSE!!

3-credit hours, Credit towards Biology & Plant Biology Majors  
**\*Fulfills the ACE-10 requirement\***

Dr. Sabrina Russo, [srusso2@unl.edu](mailto:srusso2@unl.edu), 208 Manter Hall

*Ecological interactions are the interactions that organisms have with each other & their environment. This course will explore how ecological interactions affect biodiversity & ecosystem function. It will introduce you to conceptual & theoretical frameworks and quantitative, observational, experimental, & phylogenetic approaches used in studying ecological interactions.*
